### Comments:

The bank's average LCR for the quarter ending 30 June 2020 stood at 594% well above the regulatory requirement.

The bank's HQLA is primarily made up of cash, unrestricted balances with Central Bank, Sovereign and Central Bank Securities. The bank's excess EUR denominated HQLA stock is used to cater for the LCR requirements of its other material foreign currencies.

The main contributors to NCO were those associated with the movements in customer loans and deposits base, and on interbank funding and borrowing.
